Alternative Initiative

I was thinking about an alternative way for doing initiative. I wanted to alter how initiative happens, giving priority to people who are 'closest' to the initiation of a fight.

If you want to roll this way...

Roll on the initiative table, and subtract your dexterity modifier, so LOWER is better .

Initiatve Die	Range
d20	240' or more
d12	120' - 240'
d10	full move
d8	half move
d6	5'
d4	In a Tavern *

- If you're in a tavern or fighting establishment, you're already on edge, and stuff is about to happen.

If you must...

Yes, you can flip the table over, letting people roll bigger dice if they're closer, but it's getting away from what I wanted to do, attempt to let the people closer to the epicenter of combat all act closer together.
